
How do I change Photoslide titles to UTF-8 in 1.5

Posted by uno - 2008/02/19 00:03

I am finishing a The News based site in Croatian, and need Photo Slide titles to accept non English characters.

Currently that's not the case.

Everything else is working pretty fine and I wish to congratulate you for fabulous template.

I found solution for it :)

File : class.psdب.php :

after line (line number 38):

```
mysql_select_db($db, $this->connection);
```

add this code:

```
mysql_query ('SET NAMES utf8');  
mysql_query ('SET CHARACTER_SET utf8_general_ci');
```

of course probably you should to rewrite text with non English chars ;)

Thanks, Dziudek,

now it's working fine.

The file is on .../administrator/components/com_gk_photoslide/class.psdب.php

But there is another way...

But there is another way...

I found it and put the code after the old code

```
"mysql_select_db($db, $this->connection);"
```

but it still doesn't work :(

What ist the other way?

See this video Tutorial (not oficial)

This example was made on J!1.5 db

Video Tutorial Link

Dear Support,

I watched the video and made exactly the things you show and then changed the fields in my Photo Slide in my Web-sit Control panel, but it still doesn't work. Here you can see:

I suppose that you use Russian Language...

Honestly, i don't know witch encode is Russian language.

If you know, just make the same steps, but select instead of utf8_general_ci the russian one.

That will do it.

Remember, after you do this, you must go to your Photoslide Administration and rephrase the characters again, so the changes made on the db may have effect on characters display.

Cheers

I use Bulgarian which is also cyrilic language.

If I change everything to cp1251_bulgarian_ci will Photo Slide work?

Yes, i don't see why not.

Only change the fields indicated on the video.

They are the ones that are important for you.

Don't forget to rephrase again your text, after changes on db.

If you don't do this, it will not show right.

Cheers

"Olá Paulo. Tenho que escrever em inglês."

Hi :D

The utf8_general_ci should work, but if not, set to latin 1.

So, go to your sql database and change the jos_gk_photoslide_groups and jos_gk_photoslide_images tables and set to latin 1, instead of latin 2.

Return to your text in Portuguese on the Photoslide administration, rephrase again and save.
It should work.

If you have any problem, email me: paulogavickcom

Cheers (Abraço)
