## function.date and function.mkttime error messages

Posted by dariusm - 2008/03/14 06:27

---

Greetings...

I'm using JSAS on my local cptr, with Joomla 1.5 installed, to get the hang of Joomla and to set up my site. I have The News template installed and I get this message showing up on my homepage:

Warning: mktime() : Windows does not support negative values for this function in  
W:\www\joomla\modules\mod\_gk\_news\_block\helper.php on line 428

Warning: date() : Windows does not support dates prior to midnight (00:00:00), January 1, 1970 in  
W:\www\joomla\modules\mod\_gk\_news\_block\helper.php on line 428

Don't know what the issue is... any help is appreciated!!

You check the newest version of News Show II - 2.2.1 ? You can find link to it in FAQ section on our homepage :)
